Comments: Inflow boxes in place but hydrolic system for opening and closing doors not set up. Doors welded open for the mean time. Systemwas getting ready for start up on the 15th, due to turtle incident observer program starting a week early. Waiting on pins for hydrolic system. Parts should be in tomorrow and will take a couple of days to put in. Observer will maintain bridge watch and check drag-heads till inflow system is set up.

Port Dis. Box - Fore h'shoe crabs 8-10, barndoor skates 5-7, whelks, rock

Port Dis. Box - Aft NA flounder(1), whelks

Stbd Dis. Box - Fore h'shoe crabs (10-12), barndoor skates (8-10), spidercrabs (4-6)

Stbd Dis. Box - Aft h'shoe crabs (6-8), barndoor skates (6-8), spidercrabs (6-8), whelks, rock

Comments: Observer examined contents of discharge boxes extremely carefully. No other possible turtle parts were found. The sample taken from the starboard draghead was double bagged and put in the captain's freezer until it can be sent to a lab for verification. The sample has skin that is very 'turtle-like' and some bone and cartilage. The exposed breaks in the cartilage as well as the skin appear relatively fresh. The rest of the sample is so inundated with mud and sand that it is impossible for observer to discern which body parts they might be.
