DEAD DOLPHIN

Dolphin was in Tail Bag when caught, it was already stiff, perhaps it was drowned making 42 min. Tows. No scars or marks on it. Sometimes they swim in the nets and swim out playing and get trapped in net and drown.

We made calls to Galveston Lab & they gave me a phone # in LA. for turtles and stranded mammals, they called me back, but I missed the call so I called them back, left a message but had no response!

Called Galveston Lab.
