A Workshop on Research and Monitoring for the Interior Population of Least Terns

April 4-5, 2012
St. Louis, MO

Recipients of this email have been identified as key participants in a workshop focused on the interior population of Least Tern. Please read below and RSVP to confirm your attendance. An agenda is currently in joint development by USACE and USFWS and will be provided when finalized prior to the workshop.

What: A joint USACE/USFWS workshop focusing on the Interior Least Tern. The main objectives of this workshop are to (a) review the conservation status of ILT; b) identify gaps in knowledge for understanding limiting factors for long-term population persistence, and (c) identify key short- and long-term research and monitoring needs that provide the science to support persistence.

When and Where: The workshop will be held Wednesday and Thursday, April 4-5, 2012, in St. Louis, MO. The exact venue for the workshop, along with a draft agenda, are being determined now and that information will be provided ASAP.

Please RSVP by 12 March to Richard Fischer (Richard.A.Fischer@usace.army.mil).

Workshop Sponsors and Coordinators:

U.S. Army Engineer Research and Development Center, Environmental Laboratory
U.S. Army Engineer District, Omaha
U.S. Fish and Wildlife Service

Dr. Richard A. Fischer, Research Wildlife Biologist, US Army Corps of Engineers, Environmental Laboratory, Engineer R&D Center, Vicksburg, MS
